Children, watch your mouth

For most children and parents, daily teeth-brushing is a necessary chore to be endured, but not for the kids at Woodhouse Grove Kindergarten. The Box Hill students were all smiles as they learnt how to look after their teeth as part of the Smiles 4 Miles health program. Co-ordinated by Whitehorse Community Health Service and Dental Health Services Victoria, the program teaches students tooth-friendly eating and drinking policies, and runs oral health education activities with their parents. About 400 Whitehorse children are involved in the state-wide program. For more information, visit www.dhsv.org.au
